### Blue-green algae red alert warning in Pindari Dam

The Barwon Regional Algal Coordinating Committee (RACC) has issued a red level warning (high alert) for blue-green algae in Pindari Dam.

Routine monitoring by State Water has identified high numbers of potentially toxic blue-green algae in Pindari Dam. The red level warning indicates that waters are unsuitable for recreational use or primary contact by domestic users and may also pose a threat to livestock.

The species of blue-green algae identified are potentially toxic and may cause gastroenteritis in humans if consumed and skin and eye irritations after contact. Boiling the water does not inactivate algal toxins.

Local residents and visitors should avoid any water that appears bright green, where obvious green scums are present, or a distinctive odour is noticeable. Blue-green algae are usually very obvious, appearing as clumps or specs in the water and are often associated with a strong musty or earthy odour.

People are advised not to enter the water, and are further advised not to drink untreated water whilst a red level warning is in place.

Landholders are advised to remove stock from the river foreshores as blue-green algae are known to cause stock illness or even death. Dogs are particularly susceptible as they ingest algae by licking their coats.

There is some evidence that small quantities of algal toxins may enter fish flesh when a bloom produces toxins. Any fish caught in water affected by a bloom should be cleaned and washed thoroughly in uncontaminated water and any internal organs disposed of before consumption.

Water quality monitoring of Pindari Dam will continue. This red level warning will remain in place until such time as the Barwon Regional Algal Coordinating Committee advises that it has been lifted.

Information updates about blue-green algae blooms and red level warning areas can be obtained from the Regional Algal Coordinating Committee freecall Algal Information Hotline on 1800 999 457 or at [www.water.nsw.gov.au/Algal alerts](http://www.water.nsw.gov.au/Algal%20alerts).
